`myjadytrack.firebaseio.com/jady-download-link.html`
2. Download and install the JadyTrack app on your mobile.
3. Open the JadyTrack app.

Familiarizing Yourself with The Interface

Sign In / Register Account

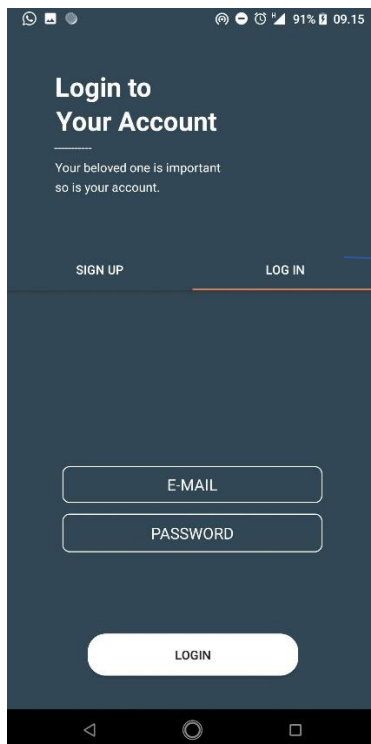

Once you launch JadyTrack app, you will be welcome with onboarding screens that full of information about our features.

But before you can access our features, you have to sign in your account first.

Register new account

If you are new to experience JadyTrack, choose **Sign Up** button on the left side of the screen.

1. At this step, **fill** all the information that needed. We promised, all information that you fill will be secured.
2. Click **sign up**. You will be automatically signed in and redirected to the home page,

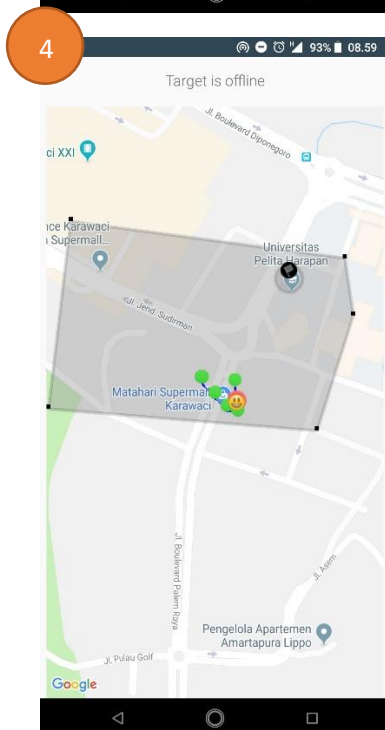

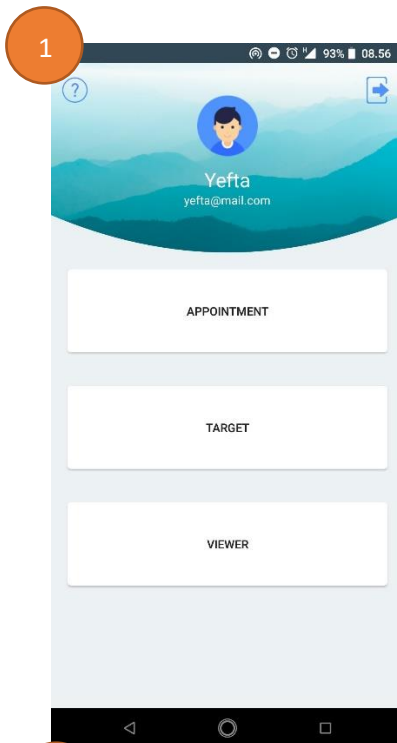

NOTE: For your own security, please fill complicated and unpredictable password for your account.

Signing In

If you have your account already, press the **log in** button on the right side of the screen. And **fill in** your email address and password in the allocated fields.

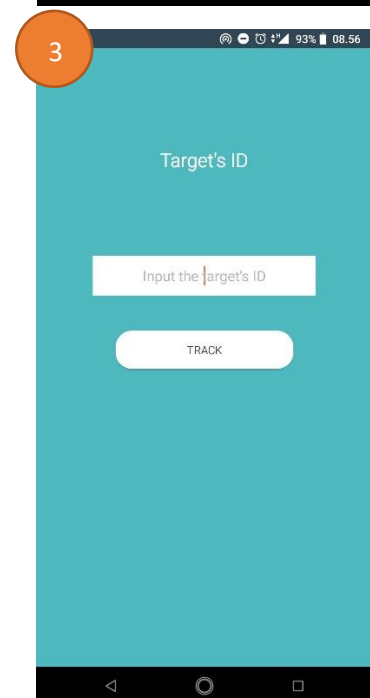

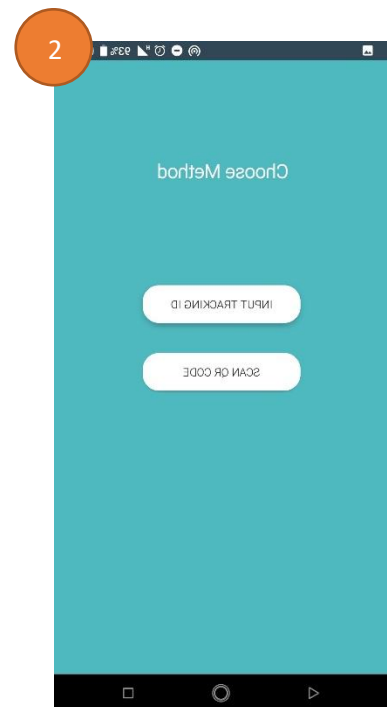

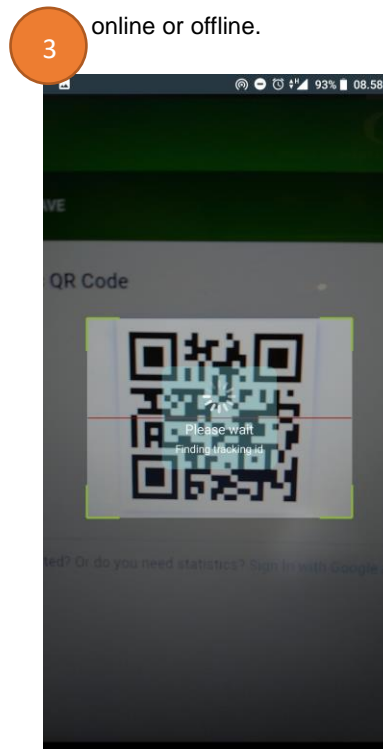

After that, press the **login** button to complete the process. You will be directed to home screen of JadyTrack after you are logged in!

How to track your loved ones?

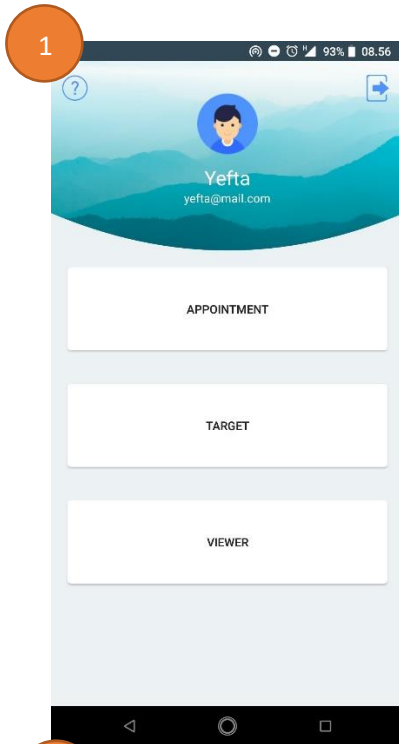

You can view your loved one's position right in your hand through JadyTrack app. No more worries, no more "where are you?" question. Here's the guide to track your loved one's:

1. In your home screen, quick tap **viewer** button on the bottom of the screen and you will be redirected to another page to identify your target.
2. You have two different options to identify your target. You can **scan target's QR code** or **manually input your target's tracking ID**.
3. Scan the QR code right away or fill in the target's tracking ID.
4. After target's tracking ID identified, you will be redirected to another page with full of maps layout. You able to see target's position and target's status is online or offline.

What can I do when I am the target?

-LdHD7fy91O87KzFzsDS

SHARE ID

When you become the target, you can do many things to make your viewer not worries about you just like old times. First thing first! You have to broadcast your position so viewer able to see your location.

1. In the home page, press **target** button above the viewer button.
2. Press **enable broadcast** to broadcast your location so your viewer can see your location in real-time.
3. First of all, press **Get Tracking ID** to help you connected with your people you trust through QR code or Tracking ID.

SOS (Emergency Feature)

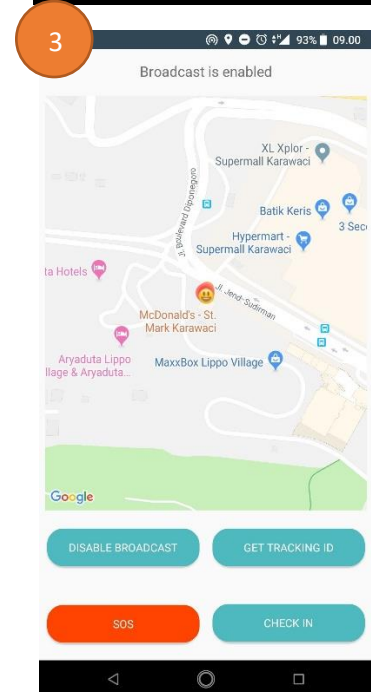

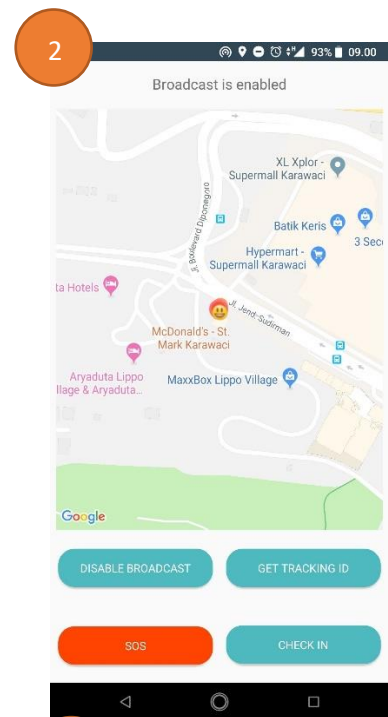

If you are in emergency situation, press **SOS** button to notify your viewer that you need help!

Check-In Feature

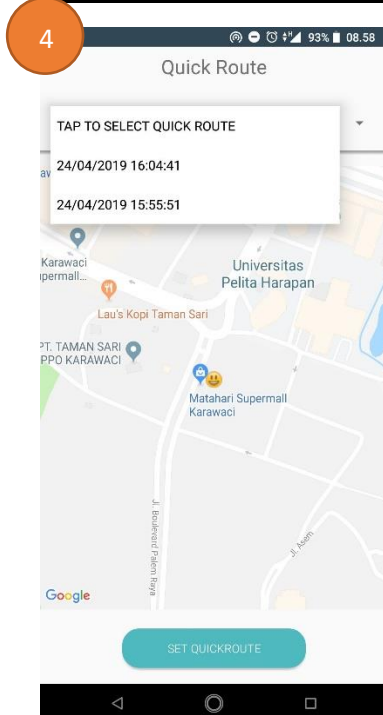

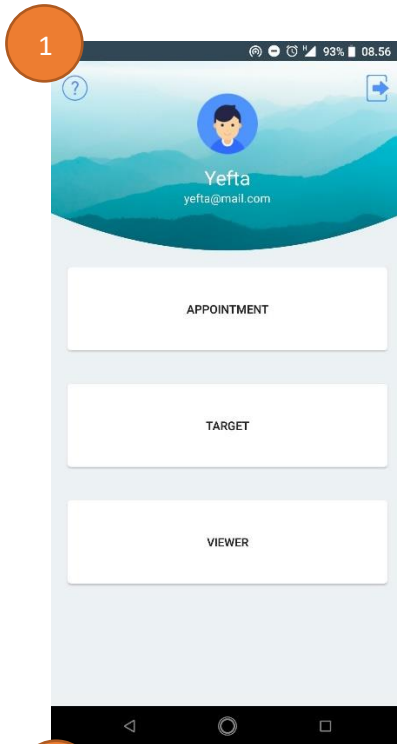

If you arrived at the destination that have been set by the viewer, press **check-in** button to notify your viewer that you have arrived already.

4. If you pressed **Get Tracking ID** button, the system will auto-generate the QR code and the tracking ID. So, the viewer can see your location when the viewer scanned your barcode or manually input your tracking ID.

NOTE: Tracking ID that generated is safe and secured. And it only works per session only. So, it only can be seen by people you share your tracking ID with.

What can I do in appointment page?

1. To access appointment page, you can press the **appointment** button right away on your homepage.
2. Just like viewer page, you have to identify your target first by scanning target's tracking ID or manually insert target's tracking ID.
3. After your target identified, you can see target's position right away in real time. On the bottom of the page, you can see two main features for your target.

Geofence Feature

You can set your geofence with custom shape. Set your geofence as what you want by pressing the map as the edge of the shape. If you press the wrong position, press **undo** right away

Quick Route Feature

If you ever use geofence feature, you can set the same geofence through quick route feature. Choose the geofence based on the history that you set before
